ART IN A CARD!

A unique and creative way to celebrate Children's Day this November

Brought to you by: Go for Health – a healthcare initiative by Stemade Biotech

---

It's the time of the year when we all celebrate the day dedicated to all our wonderful children– yes, it is the month when we all celebrate Children's Day!

This year we give the celebrations an innovative twist, and bring to you an innovative initiative named "**Art in a Card**" to celebrate Children's Day. Your child gets an opportunity to design their own Children's Day card – thereby lending more creativity to this fun and enjoyable exercise. This is based on a very simple premise viz. "**the power of a Creative mind in a Healthy body**".

You will be pleased to know that this initiative is being conducted across Mumbai, Bangalore and Delhi. It gives us immense pleasure in welcoming you and your child to be part of the festivities. It has been our earnest desire in bringing **Art and Health** together to emphasise its importance towards creating healthier communities.

There are a host of exciting prizes up for grabs which will be communicated by Stemade **to DPSI (R.K.Puram)latest by 10th December 2014:**

- ***All-India Grand Prize for Best Entry (Std. 1&2): LEGO Set worth Rs 10,000/-***
- ***All-India Grand Prize for Best Entry (Std. 3&4): LEGO Set worth Rs 10,000/-***
- ***1st Runner-up Prize per city (Std. 1&2): LEGO Set worth Rs 5,000/-***
- ***1st Runner-up Prize per city (Std. 3&4): LEGO Set worth Rs 5,000/-***
- ***2nd Runner-up Prize for per city (Std. 1&2) : LEGO Set worth Rs 3,000/-***
- ***2nd Runner-up Prize for per city (Std. 3&4) : LEGO Set worth Rs 3,000/-***

GO FOR HEALTH

Dear Mother,

We understand the sacrifices you make for your family. We understand the value of each sleepless night spent for your child. We salute your solidarity through every single step of your child. Your concern is not just about his present, but about his future. No doubt that you must have taken all efforts and care to secure your child's education, overall development but what about HEALTH?

Why Dental Stem Cells Preservation?

- Lifestyle diseases e.g. Cancer, Diabetes, Hypertension are now more in occurrence than infectious ones
- With progress in stem cell therapy, this scenario will change
- Dental stem cells have potential to cure these lifestyle diseases

Benefits of Preserving Dental Stem Cells

- Collection of stem cells from tooth is easy and quick
- Dental stem cells are ideal for tissue re-construction
- They are expandable & can be multiplied
- May be used to treat tissue & organ related diseases e.g. Diabetes, Heart/ Liver/ Kidney diseases, Arthritis, Spinal cord injuries

Easy 3 Steps Process

Step 1: Enrolment with Stemade

Step 2: Tooth Collection

Step 3: Certification of Preservation

Who can preserve?

Children between 5-12 years of age (Milk teeth are the best)

Young teenagers who have been advised to wear 'Braces'

Adults (up to 30 years age) during wisdom tooth extraction
